

Meeting Notice

Significant Changes to Wind Load Provisions

Please join us for a viewing of the recorded webinar, "Significant Changes to the Wind Load Provisions of ASCE 7-10 and Coordination with the 2012 IBC and 2012 IRC." Basic wind speed maps have been updated to reflect strength design-level wind speeds, while also incorporating newly available data. The methodology for incorporating the new wind speed maps into the IBC and IRC, and how these new maps affect wind speed "triggers" will also be addressed. This webinar also discusses the changes in the IBC and the IRC necessary for correlation with wind load design provisions of ASCE 7-10.

DATE: Tuesday, September 10, 2013

FEE: Free to SEARI members or join at the door for \$60.00/year (includes 5 events/year + Structure Magazine) (A special single meeting fee of \$10 for prospective members will be accepted)

TIME: 4:30 p.m. – 6:30 p.m.
